

# FAMILY-FOCUSED DENTISTRY

Donna and Mike DeCaigny  
with their children Cole, Emma and Elise

HINSDALE DENTISTRY first opened its doors in downtown Hinsdale in 1969. Since then, the practice has been providing exceptional dentistry to generations of families in Hinsdale and the surrounding suburbs. Doctors Zivile Chirban, Mike Kowalczyk and Peter Harnois have a combined 71 years of chairside experience performing pediatric, family and aesthetic dentistry.

The dentists' advanced technologies allow them to offer less invasive and more comfortable dental procedures to both pediatric and adult patients. In the practice's 46 years, the providers and staff have built a reputation as one of the finest centers for children's dentistry in the western suburbs, serving children as young as three. Their Water Laser by Biolase provides fillings without painful, noisy drilling. This gentle laser often renders shots of anesthetic unnecessary, helping young and needle-phobic patients feel relaxed in the dental chair. They also offer laser cavity detection with DIAGNOdent, which diagnoses decay as early as possible. This prevents unnecessary treatment, conserves enamel and caters to patient comfort.

Hinsdale Dentistry's goal is to ensure the entire family's experience is the best it can be, from your children to yourselves. Families have flocked to the practice for decades both to take advantage of their technology and because the entire family can receive professional, gentle and minimally invasive care at one office.

The DeCaigny family of Hinsdale is a shining example of the impact that Hinsdale Dentistry has made on the residents of Hinsdale, Clarendon Hills, Oak Brook, Burr Ridge, Western Springs and the surrounding communities.

Here's what the mother, Donna, had to say when we sat down to discuss what it means to have her whole family receive dental care from the team at Hinsdale Dentistry.

#### How long have you and your family been Hinsdale Dentistry patients?

I have been coming to this office for about 15 years. I found the practice shortly after we moved to Hinsdale from Chicago. After seeing how well HD treated our family, my husband Mike left his dentist in the city and came here as well. We've never looked back!

**Describe a routine visit to the office.** I wait just a minute in the beautiful reception room, and then

head back to the exam room for my cleaning. The atmosphere is welcoming and calming. During my appointment, I find it easy to talk to the staff and get answers to any questions I have.

**What does the front desk staff do to help you feel comfortable?** The staff knows me and my family right away, and always greets us with a smile. We feel like a part of the HD community.

**Do you find it easy to communicate your family's dental goals with Hinsdale Dentistry's team?** I can confidently say that our needs are all met. The dentists always cover all the bases, providing excellent care that is guided by our priorities.

**What led you to choose Hinsdale Dentistry as your children's dental care provider?** We love that both Dr. Chirban and Dr. Kowalczyk treat kids, and are so happy with the work they have done for our children. They are patient and calm, and that helps our kids feel good about treatment. Their gentle care puts them at ease.

**How has the practice's laser technology impacted your kids' dental experiences?** The laser technology has been great. Laser treatment helps prevent our

youngest daughter from getting scared or feeling anxious when receiving dental treatment.

**How does Hinsdale Dentistry's extensive experience with pediatric and family dentistry shape your perception of the practice?** We love being able to find expert care for both children and adults under one roof. Our kids are more comfortable because they come to the same office as their parents. Plus, setting up family exams is a seamless process!

**Would you trust Hinsdale Dentistry if you ever need adult dental work?** We do use this office for adult dental work, and are pleased with the results. I'm typically a nervous dental patient, but Dr. Harnois helps me feel reassured.

**Why would you recommend Hinsdale Dentistry to your friends and other families?** I have sent many friends and neighbors to HD, and will continue to recommend the practice. I know that anyone I refer will get the same level of attention, care, and expertise that my family has received.
